EDITOR'S PREFACE

With Atlatl: Occasional Papers 3, Glenn Stone replaces John Andresen as Co-Editor. This issue is the last for Edward Staski, who, along with John, founded the series. Glenn will continue on with number 4, along with a new Co-Editor.

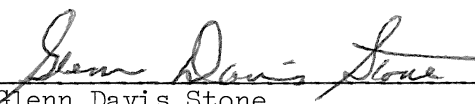

Atlatl: Occasional Papers has grown over the past two years from a departmental opportunity for student publication to an anthropological journal with nation-wide distribution. The quality of articles has risen and the scope of topics has increased. The journal is now abstracted in a number of compendiums and appears in a growing number of institutions.

We would like to thank the Associated Students of the University of Arizona for continued financial support. The Anthropology Club and the Department of Anthropology at the University of Arizona both helped financially and spiritually. Denise Shay did the cover artwork for number 3. Gail Staski did the typing.

Special thanks go to the "retiring" John Andresen for contributing expertise and labor while finishing with production. Anita Cohen, Sue McCombie and others who were anxious to see their articles in print also gave time and moral support to the editors.
