CONTENTS

SYMPOSIUM LEGAL PROTECTION OF AMERICA'S ARCHAEOLOGICAL HERITAGE

	<i>Page</i>
INTRODUCTION..... <i>James A.R. Nafziger</i>	675
<p>The author points out the various natural and man-made threats to our cultural heritage, and indicates the need for cooperation between the legal and archaeological professions.</p>	
FEDERAL POLICY AND LEGISLATION FOR ARCHAEOLOGICAL CONSERVATION..... <i>Paul R. Fish</i>	681
<p>The author briefly discusses the meaning of archaeology and the various useful archaeological investigatory techniques. The major congressional and judicial responses to the need for archaeological protection are analyzed.</p>	
FEDERAL PROTECTION FOR ARCHAEOLOGICAL RESOURCES..... <i>Ronald H. Rosenberg</i>	701
<p>The author presents the historical development of federal cultural resource protection as a setting for a rigorous analysis of the Archaeological Resources Protection Act of 1979.</p>	
PROTECTION OF CULTURAL PROPERTY: THE CANADIAN APPROACH..... <i>Sharon A. Williams</i>	737
<p>An excellent contrast with American efforts in the area of archaeological preservation is the Canadian experience. The author discusses the Canadian national Cultural Property Export and Import Act of 1975 along with the various provincial legislative efforts.</p>	

Articles

<i>USERY</i> LIMITS ON NATIONAL INTEREST..... <i>David S. Bogen</i>	753
<p>The intricate balance between federal and state power, authority, and autonomy is analyzed in this discussion of the Court's 1976 decision in <i>National League of Cities v. Usery</i>. The author concludes that as a direct result of the Court's definition of local autonomy, resistance may be expected to federal policy impositions which <i>Usery</i> recognized would properly be undertaken at the federal level.</p>	

ALLOCATING DECISIONMAKING IN THE FIELD OF
ENERGY RESOURCE DEVELOPMENT: SOME QUESTIONS AND
SUGGESTIONS*James M. Fischer* 785

The recently proposed Priority Energy Projects Act of 1980 and the proposed Energy Mobilization Board provide the structure for the author's analysis of federal preemption and state implementation with respect to national energy policy. Principles of federalism and the problems presented thereby are discussed, with the author concluding that the preferable means of federal energy policy implementation is through Congress' spending power.

Notes

EVIDENTIARY STATUS OF PAYMENT OF
OSHA FINES *Lorna Blackburn* 871

Sanctions imposed under the Occupational Safety and Health Act of 1970 pose problems in the context of subsequent civil litigation arising from job-related personal injury. Since employers often do not contest OSHA citations, the author concludes that such citations' status should be identical to that of prior pleas of nolo contendere.

SUBSIDENCE: AN EMERGING AREA OF THE LAW *Jennele Morris* 891

The withdrawal of groundwater from underground aquifers for man's various activities often causes the land surface to sink. The damage caused to land and fixtures unowned by the pumper should be redressed under legal theories relating to loss of subjacent support and not under general water law.

LIABILITY IN PROFESSIONAL SPORTS: AN ALTERNATIVE
TO VIOLENCE *Candyce Beumler* 919

Criminal and civil liability for harms committed in the course of professional sporting contests are explored as a means of curbing the disturbing trend of violent conduct in those games.

FIRST AMENDMENT PROSCRIPTIONS ON THE INTEGRATED BAR:
LATHROP V. DONOHUE RE-EXAMINED *Jeffrey R. Parker* 939

The establishment and organized activities of the integrated bar raise significant constitutional issues regarding the first amendment rights of member attorneys. The author analyzes the state interests and the individual rights at stake, points out those aspects of bar integration and operation that are unconstitutional, and suggests various remedial mechanisms available to member attorneys.
