

CALL FOR PAPERS
ANNUAL MEETING OF DEGUWA E.V. ON UNDERWATER ARCHAEOLOGY:
IN POSEIDENS REICH XXIII

on the topic of
Waters as a Resource

to be held in close cooperation with the SFB/CRC 1070 ResourceCultures
under the patronage of President Prof. Dr. h.c. Bernd Engler
15–18 March 2018 at Eberhard Karls Universität, Tübingen, Germany

Today, as in antiquity, waters serve in various ways as resources—as waterways for traffic, places to harvest fish and other foods, a source of energy, a reservoir, or as a home of spiritual powers. The type and intensity of use depend, apart from natural conditions, mainly on cultural, social and political factors.

The subject of this conference is the diversity of the ways in which waters are used and the corresponding background conditions. We will use concrete case studies to consider the bodies of water, how they are used, and the corresponding infrastructure on land (ports, landing places, coastal/riverine landscapes). Naturally we will also examine the role the bodies of water play in the corresponding societies in this forum conducted together with the CRC/SFB 1070 ResourceCultures at the University of Tübingen.

Contributions on these questions are welcome as well as presentations on new archaeological investigations and excavations from sites below groundwater levels or in maritime and limnic areas.

We invite you to send your applications for presentations or posters, giving the title and an abstract of 250 words (incl. two photographic images), to the following email address:

mail@deguwa.org

Applications close 31 October 2017.
