

CORRIGENDA TO “A GEOGRAPHICAL ANALYSIS OF THE INJUNCTIVE IN THE AMARNA LETTERS FROM SYRIA-PALESTINE AND ITS RELEVANCE FOR EGYPTIAN IMPERIALISM”

Luis Robert Siddall  
School of Oriental and African Studies, the University of London

*There was an error in the tabulation of the data in my article on the geographical distribution of the injunctive in the Amarna Letters from Syria-Palestine in volume 1:4 of this journal.<sup>1</sup> On page 7, the tables for southern Syria and the Galilee, Acco, and the Northern Valley were corrupted, repeating the information given for the Lebanese Littoral. The error is typographic and does not affect the observations and analysis. The article itself has now been corrected, but note that the correct tables are as follows:*
